

HOPE Partner Quick Start

Version: 29.29 - Three-Path Partner Workstation Updated: July 11, 2026

Choose the useful level today

HOPE gives every organization three visible ways to participate. Each path creates value on its own, and organization information carries forward if the partner continues later.

Path 1: Confirm Our Listing - about 2 minutes

Check the public address, phone, website, hours, and services. Correct only what changed. No Partner Workbench account is required. HOPE reviews the organization-level confirmation before changing a public listing.

Path 2: Use Partner Tools - about 5 minutes

Open private frontline tools immediately: Warm Handoff Composer, Print Room, referral slips, privacy cards, and the Shift Cockpit. No public publishing is enabled at this level.

Path 3: Join the HOPE Network - about 15 minutes

Verify affiliation and unlock live service-status publishing, Regional Pulse participation, network asks and offers, shared tools, and the Verified Partner Passport.

The daily workstation

1. Check Today's Status.
 2. Review What Changed Nearby.
 3. Tap Build Me a Tool.
 4. Choose the destination, need, and sharing permission.
 5. Review exactly what will be used.
 6. Text, print, copy, or call.
-

Why partners return

- Current operational changes appear near the top.
- The main action is always one tap away.

- Recent organization-level actions remain visible on the device.
 - Every completed task produces a clear receipt and next step.
 - Partners can ask the network for supplies, space, transportation, personnel, or training.
 - Partners can start small and unlock more only when it is useful.
-

Provisional and verified access

A tools-only workspace can create private drafts, handoffs, and printable materials immediately. Live status publishing and network asks or offers require affiliation verification and a one-time partner access code issued by HOPE.

Privacy boundary

Never enter client Social Security numbers, full dates of birth, medical records, case numbers, immigration files, private addresses, document photographs, or open case notes. Warm Handoff information is temporary, minimum necessary, and clears automatically after 15 minutes.
